

# LEGO ROBOTICS DAY CAMP

## The Game Task

The Do-er is blindfolded, seated in a chair at the end of the table, and given two chopsticks. That person's job is to follow instructions. They do not know exactly what or why they are moving around the chopsticks.

The Talker is positioned so they cannot see the Do-er at all. The Talker holds the two game cards and reads the words that Pointer 1 and Pointer 2 point to.

Pointer 1 can only point to words on the left-hand card. Pointer 2 can only point to words on the right-hand card. Pointers may not speak – work silently with your Pointer partner.

**YOUR GOAL IS TO GET THE BLINDFOLDED PERSON TO MAKE CONTACT BETWEEN CANDY AND RUBBER BANDS. Your group can eat all of the candy that is touching or surrounded by rubber bands at the end of two minutes.**

Good luck!
